

## A new name – a new start

Since the merger of Kimadan and Tim Thyregod about a year ago, a lot has happened at the address in Thyregod. Kimadan is now an integrated part of the company and the organizational adjustments have been carried out. Now the time is right for a new profile for the company.

We have chosen the name Thyregod A/S. It is simple and straight forward as the company lies in the town Thyregod. The product portfolio consists of the three brands Tim, Thyregod and Kimadan and these names will still be found on the different machines.

Tipping trailers, silage trailer, dump trailer.

Beet harvesters, cleaner loader, tractor sweeper, interrow cultivator, stone picker, stone rake.

Products for slurry handling with focus on slurry tankers, mixers and pumps.

The new company logo has a nice symbolic value to it. The upper black part symbolises the Celtic people, who were smiths. They used such masks during their work. The Celtic people lived in Denmark therefore the Danish flag is also part of the logo. In the bottom of the logo the green Thyregod, which is home and now also the name of the company.
